| Introduction | xix |
| 1. GENERAL FORMALISM | 1 |
| 1. Introduction | 1 |
| 1.1 Kinematics and dynamics | 3 |
| 2. Variational versus Newtonian formalism | 4 |
| 3. Generalized Lagrangian formalism | 8 |
| 4. Kinematical variables | 10 |
| 4.1 Examples | 16 |
| 5. Canonical formalism | 17 |
| 6. Lie groups of transformations | 19 |
| 6.1 Casimir operators | 23 |
| 6.2 Exponents of a group | 23 |
| 6.3 Homogeneous space of a group | 25 |
| 7. Generalized Noether's theorem | 26 |
| 8. Lagrangian gauge functions | 31 |
| 9. Relativity principle. Kinematical groups | 33 |
| 10. Elementary systems | 34 |
| 10.1 Elementary Lagrangian systems | 39 |
| 11. The formalism with the simplest kinematical groups | 40 |
| 2. NONRELATIVISTIC ELEMENTARY PARTICLES | 47 |
| 1. Galilei group | 48 |
| 2. Nonrelativistic point particle | 51 |
| 3. Galilei spinning particles | 55 |
| 4. Galilei free particle with (anti)orbital spin | 63 |
| 4.1 Interacting with an external electromagnetic field | 67 |
| 4.2 Canonical analysis of the system | 69 |
| 4.3 Spinning particle in a uniform magnetic field | 72 |

| | | |
|-----------|--|------------|
| 4.4 | Spinning particle in a uniform electric field | 84 |
| 4.5 | Circular zitterbewegung | 85 |
| 5. | Spinning Galilei particle with orientation | 86 |
| 6. | General nonrelativistic spinning particle | 87 |
| 6.1 | Circular zitterbewegung | 90 |
| 6.2 | Classical non-relativistic gyromagnetic ratio | 92 |
| 7. | Interaction with an external field | 93 |
| 8. | Two-particle systems | 98 |
| 8.1 | Synchronous description | 99 |
| 9. | Two interacting spinning particles | 103 |
| 3. | RELATIVISTIC | |
| | ELEMENTARY PARTICLES | 109 |
| 1. | Poincaré group | 110 |
| 1.1 | Lorentz group | 113 |
| 2. | Relativistic point particle | 118 |
| 3. | Relativistic spinning particles | 121 |
| 3.1 | Bradyons | 121 |
| 3.2 | Relativistic particles with (anti)orbital spin | 137 |
| 3.3 | Canonical analysis | 142 |
| 3.4 | Circular zitterbewegung | 145 |
| 4. | Luxons | 147 |
| 4.1 | Massless particles. (The photon) | 148 |
| 4.2 | Massive particles. (The electron) | 151 |
| 5. | Tachyons | 160 |
| 6. | Inversions | 162 |
| 7. | Interaction with an external field | 163 |
| 4. | QUANTIZATION OF | |
| | LAGRANGIAN SYSTEMS | 169 |
| 1. | Feynman's quantization of Lagrangian systems | 170 |
| 1.1 | Representation of Observables | 173 |
| 2. | Nonrelativistic particles | 177 |
| 2.1 | Nonrelativistic point particle | 177 |
| 2.2 | Nonrelativistic spinning particles. Bosons | 179 |
| 2.3 | Nonrelativistic spinning particles. Fermions | 182 |
| 2.4 | General nonrelativistic spinning particle | 184 |
| 3. | Spinors | 185 |
| 3.1 | Spinor representation on $SU(2)$ | 189 |
| 3.2 | Matrix representation of internal observables | 196 |
| 3.3 | Peter-Weyl theorem for compact groups | 196 |

| | | |
|-----------|--|------------|
| 3.4 | General spinors | 200 |
| 4. | Relativistic particles | 203 |
| 4.1 | Relativistic point particle | 203 |
| 4.2 | General relativistic spinning particle | 204 |
| 4.3 | Dirac's equation | 206 |
| 4.4 | Dirac's algebra | 215 |
| 4.5 | Photon quantization | 217 |
| 4.6 | Quantization of tachyons | 218 |
| 5. | OTHER SPINNING PARTICLE | |
| | MODELS | 221 |
| 1. | Group theoretical models | 221 |
| 1.1 | Hanson and Regge spinning top | 221 |
| 1.2 | Kirillov-Kostant-Souriau model | 225 |
| 1.3 | Bilocal model | 228 |
| 2. | Non-group based models | 232 |
| 2.1 | Spherically symmetric rigid body | 232 |
| 2.2 | Weyssenhoff-Raabe model | 234 |
| 2.3 | Bhabha-Corben model | 240 |
| 2.4 | Bargmann-Michel-Telegdi model | 243 |
| 2.5 | Barut-Zanghi model | 245 |
| 2.6 | Entralgo-Kuryshkin model | 248 |
| 6. | SPIN FEATURES | |
| | AND RELATED EFFECTS | 253 |
| 1. | Electromagnetic structure of the electron | 254 |
| 1.1 | The time average electric and magnetic field | 254 |
| 1.2 | Gyromagnetic ratio | 264 |
| 1.3 | Instantaneous electric dipole | 266 |
| 1.4 | Darwin term of Dirac's Hamiltonian | 270 |
| 2. | Classical spin contribution to the tunnel effect | 270 |
| 2.1 | Spin polarized tunneling | 278 |
| 3. | Quantum mechanical position operator | 279 |
| 4. | Finsler structure of kinematical space | 285 |
| 4.1 | Properties of the metric | 287 |
| 4.2 | Geodesics on Finsler space | 288 |
| 4.3 | Examples | 290 |
| 5. | Extending the kinematical group | 291 |
| 5.1 | Space-time dilations | 292 |
| 5.2 | Local rotations | 293 |
| 5.3 | Local Lorentz transformations | 294 |

| | | |
|-----|---|-----|
| 6. | Conformal invariance | 295 |
| 6.1 | Conformal group | 295 |
| 6.2 | Conformal group of Minkowski space | 298 |
| 6.3 | Conformal observables of the photon | 304 |
| 6.4 | Conformal observables of the electron | 305 |
| 7. | Classical Limit of quantum mechanics | 306 |
